PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years of expertise in **React Native and ReactJS**. Extensive experience delivering high-impact applications across FinTech, E-commerce, Live Streaming, and Government sectors. Specialized in writing clean, scalable code, building high-performance mobile UIs, and solving complex technical challenges to ensure successful product launches.

CORE TECHNICAL SKILLS

- **Mobile:** React Native (primary), TypeScript, performance tuning.
- **Web:** ReactJS, JavaScript, HTML, CSS, Tailwind, Bootstrap.
- **Tools & Testing:** Zustand, MobX, Jest (Unit Testing), Git, Agile/Scrum.

PROFESSIONAL EXPERIENCE

Socket 9 Co., Ltd. | **Senior Mobile and Web Developer** Mar 2021 – Apr 2026

- **Pikul & Pikul Merchant (AWC):** Developed a dual-sided React Native platform featuring an e-wallet system, loyalty/membership tiers, marketplace coupon flows, and hotel booking logic.
- **ASAPH (Live Auction):** Built a real-time bidding app from scratch, researched and implemented **VideoSDK** for low-latency streaming and integrated **Stripe** for secure credit card payments.
- **DLT Driver:** Engineered a React Native app for the Department of Land Transport with Grab-like features, including GPS tracking and identity checks, using **MobX** for robust state management.
- **TSpace Sourcing:** Developed a real-time auction module for an e-procurement web platform using ReactJS.
- **SCB Business Anywhere:** Developed secure modules for corporate banking and ensured reliability through comprehensive **Jest** testing.
- **Handigo Project:** Built a secure web-based digital check-in system for hotels featuring passport photo uploads and personal info verification.

SiamDApp (Thailand) Co., Ltd. | Web and Mobile Developer *Jan 2019 – Feb 2021*

- **CmBus:** Developed a bus ticketing app integrated with SUNMI POS devices and thermal printing for Chiang Mai Municipality.
- **Om Wallet:** Built a crypto wallet app featuring blockchain transactions and integrated food ordering services.
- **Urban-Transit:** Created a live bus tracking system using the Google Maps API for real-time GPS monitoring.
- **Tokenization Platform:** Built a web-based management tool for digital tokens using Material-UI.

School of Public Policy (SPP CMU) | Web Developer *Nov 2017 – Dec 2018*

- Developed internal web applications using PHP and Bootstrap and built a transit monitor prototype using the Google Maps API.

PranWorks Co., Ltd. | Software Engineering Intern *Mar 2017 – Oct 2017*

- Worked on the MTL Sixpacks admin portal using ASP.NET MVC and built reporting modules using Telerik.

EDUCATION

- **Bachelor of Science in Software Engineering** | College of Arts, Media, and Technology, Chiang Mai University (2013-2016).
- **Mathematics-Science Major** | Lampang Kanlayanee School (2010-2013).
