

Cover Letter (General Version for Senior Developer)

Dear Hiring Manager,

I am writing to express my strong interest in the **Senior Developer** position. With over 7 years of professional experience, **I am a developer who can handle both frontend web and mobile development.** I specialize in using **ReactJS** for web applications and **React Native** for mobile projects.

Throughout my career, particularly during my 5 years at **Socket 9**, I have successfully delivered various high-impact products across different industries:

- **Live Streaming & Payments:** Developed **ASAPH**, a live auction platform, where I implemented **VideoSDK** for low-latency streaming and integrated **Stripe** for secure credit card transactions.
- **FinTech & Super Apps:** Built core features for **Pikul**, a lifestyle super app, including E-wallet systems, membership tiering, and hotel booking modules.
- **Logistics & Public Transport:** Engineered the **DLT Driver** app, a real-time vehicle hailing platform featuring GPS tracking and job dispatching.
- **B2B & E-Procurement:** Developed **TSpace Sourcing**, a web-based auction system for suppliers using **ReactJS**.
- **Banking Standards:** Contributed to the **SCB Business Anywhere** app, focusing on secure modules and ensuring code quality with **Jest** unit testing.

I am very comfortable with a **remote contractor setup** and have a proven track record of managing my own time and delivering high-quality work independently. I am confident that my technical skills and experience in building complex products from scratch will bring great value to your team.

I have attached my resume for your consideration. You can also view my portfolio and past works at <https://pawnpunnarai.com>.

Thank you for your time and consideration. I look forward to the possibility of discussing how my background can contribute to your company.

Best regards,

Pawnpunnarai Saimoonkham (Wow)
