**Experience**

Company: Socket 9 Co., Ltd.

Mar 2021 - Present

Position: Mobile and Web Developer (Front-End)

Responsibilities: I develop and maintain a DLT Driver application. It is a Department of Land Transport Thailand application for calling and driving a vehicle. In this project, I used React Native to develop a mobile application for drivers. For the next projects, I developed some sections of the SCB Business Anywhere application using TypeScript and tested them with Unit Test (jest), and now I am developing a component of the Handigo application. Using ReactJS, guests will submit passport photos and fill out all of the necessary information for a speedy check-in before their arrival (web view).

Skills: React Native, ReactJS, TypeScript, Unit Test (jest)

Company: SiamDApp (Thailand) Co.,Ltd.

Jan 2019 - Feb 2021 (2Y 1m)

Position: Web and Mobile Developer (Front-End)

Responsibilities: My job entails creating a mobile application and a website using React JS and React Native. In my company, I have to develop projects like CM-Transit, Om Wallet, Urban Crowdfunding website, Om Platform website, CM-Transit website, and so on.

- The CM-transit application obtains real-time public transportation information in Chiang Mai.
- Om Wallet is a cryptocurrency wallet that allows users to access blockchain technology and place food orders.
- The Crowdfunding website is a donation and reward crowdfunding platform.

Skills: ReactJS, React Native, WordPress Custom theme

Company: School of Public Policy (SPP CMU), **Nov 2017 – Dec 2018 (1Y)**

Position: Web-Developer (Front-End)

Responsibilities: I work for a government-owned corporation in this organization. This project required me to develop the front-end. I designed a website for ECUP and SPP (School of Public Policy, Political Science, CMU) and constructed a new website for an organization utilizing web php. and creating web-based transportation applications in Chiang Mai, such as the CM-Transit online monitor. I'm part of a fast-growing team. So, in a short period of time. I have a lot of projects that I can finish.

Skills: Php, Html, CSS, JavaScript, Bootstrap, Google Map API

Company: PranWorks Co., Ltd.

March 2017 – Oct 2017 (8m)

Position: Software Engineering (Intern)

Responsibilities: I'm working on the Admin Web "MTL Sixpacks" for this company. This task requires me to design both the front-end and back-end. I work on web-applications in front-end positions (ASP.NET MVC). Roles in the back-end I work in the field of web administration (ASP.NET MVC). And here's a quick rundown of my project. Using the Telerik Report Tool, I'm responsible for the report module in the back-end and front-end.

Skills: ASP.NET MVC EF, MSSQL, Telerik Tool

Work: Senior Project (App-Web for tourist)

Aug 2015 – Feb 2017 (7m)

Position: Senior Project

Responsibilities: The Must is a website and mobile platform that aims to solve travel concerns by saving a variety of attractions' information. The Ionic Framework is what I use to create mobile apps. AngularJS is used to create a web application for admins. Roles in the back-end For development, I utilize the Spring Framework.

Skills: Ionic Framework, AngularJS, Spring Framework, Google Map API, HTML5, CSS3, JS and MySQL
